Sustainability approach

✓ Greenhouse Gas Emissions
✓ Water
✓ Waste
✓ Biodiversity
✓ Energy Efficiency and Fossil Fuels
✓ Social and Employee Matters
The Fund takes into account the principal adverse impacts on sustainability factors (PAIs) through binding elements of its investment strategy.
More specifically, PAIs are taken into account through activity-based exclusions based corporate revenues, norms-based exclusions and the
Berenberg Net Impact Model to select investments.

All portfolio positions of the fund generate added value for the environment and society through their products or services. Specifically, we focus on the positive contribution to solving four global challenges, which in turn include some of the topics of the Sustainable Development Goals. These global challenges also represent the investment themes of the fund: (i) Demography & Health, through medical care, health and sustainable nutrition. (ii) Climate Change, by sustainable solutions for reducing carbon emissions; (iii) Responsible Use of Resources, through efficient technologies and services; and (iv) Sustainable Growth & Innovation, through infrastructure, fair working conditions and financial inclusion.
✓ Environmental

✓ Governance
In the Berenberg Sustainable Multi Asset Dynamic we complement the established integration of ESG factors with the inclusion of companies and issuers that help to solve global challenges with their products and services. The fund invests in holdings whose business models or dedicated projects create a positive and measurable added value for the environment and society and which is based on structural growth trends and sustainable profitability, both in terms of its nature and longevity. A selection of investable Sustainable Development Goals (SDGs) serves as the starting point for the definition of our four global challenges, which also represent the investment themes of the fund. These are Demography & Health, Climate Change, Responsible Use of Resources and Sustainable Growth & Innovation. All of the funds' portfolio holdings are thoroughly assessed in a proprietary impact measurement model ("Net Impact Model") for their positive as well as potentially negative contribution to solving one or more of these four challenges. Additionally, we map portfolio holdings to the Sustainable Development Goals based on their contribution.
At Berenberg Wealth and Asset Management (WAM), we consider ESG aspects as one of the key factors in our investment decision making. We recognize that the integration of ESG helps our portfolio management to adequately analyse risk and return. To minimize certain risks arising from controversial business areas or problematic business practices, we use ESG exclusion criteria. We also place a strong focus on positive factors that promote and sustain earnings growth, such as good corporate governance. In addition to our own research, we use external ESG data to understand the sustainability profile of companies and issuers. We strive to identify material factors that are critical to improving long-term returns and the sustainability profile as part of a comprehensive ESG investment process. Internally, we discuss ESG issues openly, building on our culture of supportive collaboration among all teams. This open dialogue among our investment and ESG professionals allows us to integrate their

Research and Transparency

In-house sustainability analysis	Yes	
Research partners	Yes	
	MSCI ESG, RepRisk, IVOX Glass Lewis	
Percentage of portfolio with sustainability analysis	100 %	
Strategically important suppliers included	Yes	
Sustainability advisory committee	Advisory	
	Berenberg WAM ESG Commitee	
Analysis of portfolio CO2	Yes, backward-looking indicator	
	Among other things, we measure the Weighted Average Carbon Intensity, which indicates the exposure of the portfolio to CO2-intensive activities and thus gives a measure of CO2/climate risk.	
Sustainability reporting	Yes	
	Sustainability reporting takes place in monthly updated factsheets and in an annually updated impact report. Upon request, we provide interested and invested clients with further information.	
At least monthly portfolio publication	No	
Certification/Label awarded by independent auditors	✓ FNG Label ★★★
