Best-in/of-Class	Best-In-Class Ethos assesses companies based on a standard quantitative multi-criteria approach using approximately 100 ESG data points split into three main categories: Governance (40%), Strategy & Reporting (20%) and Stakeholders (40%). The weights of the three main categories are fixed but not those of the subdivisions which depend on the company's sector. Each company is given an ESG score based on the abovementioned criterion. The ESG score takes into account industry specific ESG characteristics and positions the company with regard to its peers. An ESG rating is attributed to each company depending on its ESG score (quantitative) and its controversy assessment level (qualitative). Based on evidence that is checked by its staff, Ethos identifies companies involved in serious ESG controversies, such as human rights and labour rights breaches, serious environmental damages, severe corruption, etc. In this process, Ethos also measures the pertinence of the companies' responses to such controversies and takes it into account in the result of the screening. In addition, for each company, Ethos applies a Carbon rating, which measures the carbon footprint of companies and compares it with the footprint of their peers (quantitative assessment) and assesses their climate change strategy (qualitative assessment), such as the strategy implemented by the company in order to reduce its carbon footprint and tackle climate change. The funds can only invest in companies with the best ESG ratings and Carbon ratings.
